PRAKRITI SINGH

Computer Science Student | Seeking SDE Internship | Full-Stack Development & Distributed Systems
prakritirajput003@gmail.com | +91 9279751183 | github.com/PrakritiS1 | linkedin.com/in/prakriti-singh23

PROFILE SUMMARY

Full-stack Software Engineer with hands-on experience building and deploying distributed backend systems (Java, Node.js, Spring Boot), relational and NoSQL databases (PostgreSQL, MongoDB, Redis), cloud-native infrastructure (Docker, Kubernetes, GCP, AWS fundamentals, CI/CD), and responsive front ends (React.js). Delivered production-style systems supporting 12,000+ TPS and 99.9%+ availability. Active open-source contributor and hackathon participant (Smart India Hackathon) with a strong record in competitive programming (Global Rank 305 of 37,985+, LeetCode). Comfortable owning projects end-to-end (architecture, implementation, deployment, and monitoring) in Agile, collaborative team environments.

TECHNICAL SKILLS

Languages: JavaScript, Java, Python, SQL
Backend: Node.js, Express.js, Spring Boot, REST API Design
Databases: PostgreSQL, MongoDB, Redis
Cloud & DevOps: GCP, AWS (Cloud Practitioner coursework: EC2, S3, IAM, VPC, RDS), Docker, Kubernetes, Linux/Bash, CI/CD Pipelines, Git/GitHub
System Design: Distributed Systems, Microservices, High-Availability, Scalability, Performance Optimization
Monitoring & Tools: Prometheus, Grafana, Apache Kafka, Distributed Tracing
Frontend: React.js, HTML5, CSS3, Bootstrap — responsive & performance-optimized UI development
AI Tools: Generative AI, LLMs, Prompt Engineering (Claude)
Collaboration: Agile/Scrum, Git-based version control, Open-Source Contribution, Team Collaboration

RELEVANT PROJECTS

Distributed URL Shortener (TinyURL Clone) | *Java, Spring Boot, Redis, PostgreSQL, Docker, Kafka*
- Designed and built a distributed system handling 100,000+ requests/day, using Redis caching to cut database reads and PostgreSQL for persistence.
- Built a Kafka-based real-time analytics pipeline and containerized the service with Docker, achieving 99.95% uptime.
- Open-sourced the project on GitHub with documentation for community contribution.

High-Performance Financial Transaction System | *Java, Distributed Systems, System Design*
- Designed and delivered a scalable transaction-processing system supporting 12,000+ TPS with <100ms latency and 99.9% availability.
- Optimized database queries and indexing strategy, reducing latency by 77%.

Compressly — Smart Image Compression Platform | *HTML5, CSS3, Bootstrap, React.js, Node.js, Image Processing*
- Built and deployed a full-stack platform (Node.js backend, React.js front end) supporting 5+ image formats with 40% file size reduction.
- Handled 1,000+ concurrent uploads and deployed via Docker, serving 50,000+ requests/day.

HerGuard AI — Women Safety Emergency Assistant | *Android, AI/ML, GPS, Firebase*
- Engineered an AI-powered safety app with real-time GPS tracking, SOS alerts, and ML-based threat detection (94% accuracy).

ACHIEVEMENTS & CERTIFICATIONS

- Global Rank 305 in LeetCode Contest (37,985+ participants); 400+ DSA problems solved; Top 5% in coding competitions.
- Smart India Hackathon — Qualified the internal (college-level) round and built a working prototype in a team under time constraints.
- Infosys Springboard — Selected for the Infosys cohort program; completed AWS Certified Cloud Practitioner (CLF-C02) preparation course and a Claude (generative AI) course.
- Advanced AI/ML Certification (Score: 22/25); HackerRank SDE Intern Certification.

PROFESSIONAL EXPERIENCE

Software Engineering Intern — ZeTheta **Jun 2026 – Present**
- Led backend system design for scalable fintech workflows, collaborating with cross-functional teams in an Agile environment.
- Optimized transaction processing modules, improving system performance and reliability.
- Built monitoring and logging infrastructure using observability tools to reduce incident response time.

Software Engineering Virtual Intern — JPMorgan Chase & Co. **Dec 2025 – Jan 2026**
- Debugged and optimized simulated transaction-processing systems, improving query performance and logging reliability.
- Applied version control (Git) best practices in a collaborative training environment.

Google Student Ambassador — Google **2026**
- Delivered technical workshops on cloud computing and system design; mentored 50+ peers in foundational programming practices.

EDUCATION

Bachelor of Technology in Computer Science Engineering **Expected: 2028**
Uttaranchal University, Dehradun | CGPA: 8.8/10
Relevant Coursework: Data Structures, Algorithms, Distributed Systems, System Design, Operating Systems, DBMS
